TECHNICAL SPECIFICATION

THE APPOINTMENT OF A SERVICE PROVIDER FOR THE SUPPLY OF DIGITISATION SERVICES FOR THE PRESERVATION OF THE SABC'S LEGACY ARCHIVE CONTENT FOR A PERIOD OF SIX (6) YEARS.

1 INTRODUCTION AND BACKGROUND

The SABC as South Africa's Public Broadcaster is mandated by Parliament and this entails offering:

The SABC TV Archive and News TV Archive are inundated with the predicament to preserve its legacy content. A prioritised amount of content reside on obsolete tape formats which need to be digitized into a long-term digital format so as to promote repurposed content of the various programme genres for the SABC services.

This document requests from the market the essential services and solution to preserve legacy content by migrating the metadata and media content to the existing SABC's LTO infrastructure in Auckland Park Johannesburg. The consideration is to put in place a preservation solution to digitise the content to promote the tapeless workflows from beginning to end, into the existing Dalet Galaxy digital file based infrastructure at TV Facilities.

The prioritised content materials that must be preserved and digitised are as follows:

- 20 000 hours of C-Format / 1-inch tape format;
- 120 000 hours of BETACAM SP tape format;
- 150 000 hours of DVCPro tape format; and
- 10 000 hours of DV/DVCam SP/LP tape.

The first phase of the SABC's digitisation of "Preservation of Legacy Material" (PLM) was facilitated through an open tender process which appointed a successful bidder following the Supply Chain Management processes in August 2016. The solution was making use of leased and managed playback tape machines to digitise tape content as per the response of the request for proposal (RFP).

The SABC has subsequently implemented the Digital Media Integration Solution consisting of the Dalet Galaxy system, which is integrated into the long-term preservation Spectra LTO tape solution. The system's implementation has opened the door to have all current content directly archived. The preservation of the current content is catalogued and stored directly onto the LTO system via Dalet Galaxy system. The process for the legacy tape preservation is motivated to have the

advantage of pushing the digitised content to the implemented system for easier processing.

The existing Digital Media Integration Solution comprises of the following:

- The Dalet Galaxy System;
 - It is used for ingesting, cataloguing, tracking and quality control of all planned assets for transmission and future re-broadcast.
 - The Media Asset Management (MAM) and Workflow Orchestration platform unifies the content broadcast value chain by managing assets, metadata, workflows, and processes across multiple and diverse production and distribution systems.
 - DALET Ingest System - Manual and Automated file ingests tools with drop-in setup for known formats and codecs
 - DALET Process/QC System - Built-in tools for transcoding and files QC; MXF OP1A (AVC-Intra 100, HDXCAM for HD and IMX50 for SD)
 - DALET Archive System
 - The Media Asset Management for Flexible, Dynamic, Structured content management
 - The process of media placeholder to enable assets registration/log in the system
- Spectra LTO Infinity system
 - Full integration with the Dalet Galaxy System to archive the finished media onto Linear Tape Open (LTO Spectra) system
 - The system retrieves and pushes media through API integration with DALET for deep archiving of content into its LTO tapes. The system has also its Media Aggregator called Kumulate for Proxy and rich media access.

2 SCOPE OF WORK

The SABC TV Media (Old Henley TV Facilities) in Johannesburg Auckland Park requires the following on site services with no removal of any content from the SABC premises and no procurement of playback machines but an expected media digitised service delivery.

The service provider must provide playback machines, tape cleaning and treatment devices, integrated storage devices, transcoding and Quality Control software and hardware and the other necessary components to deliver a digitised file to the Dalet Galaxy System to achieve this requirement as listed below in the functional requirements and services.

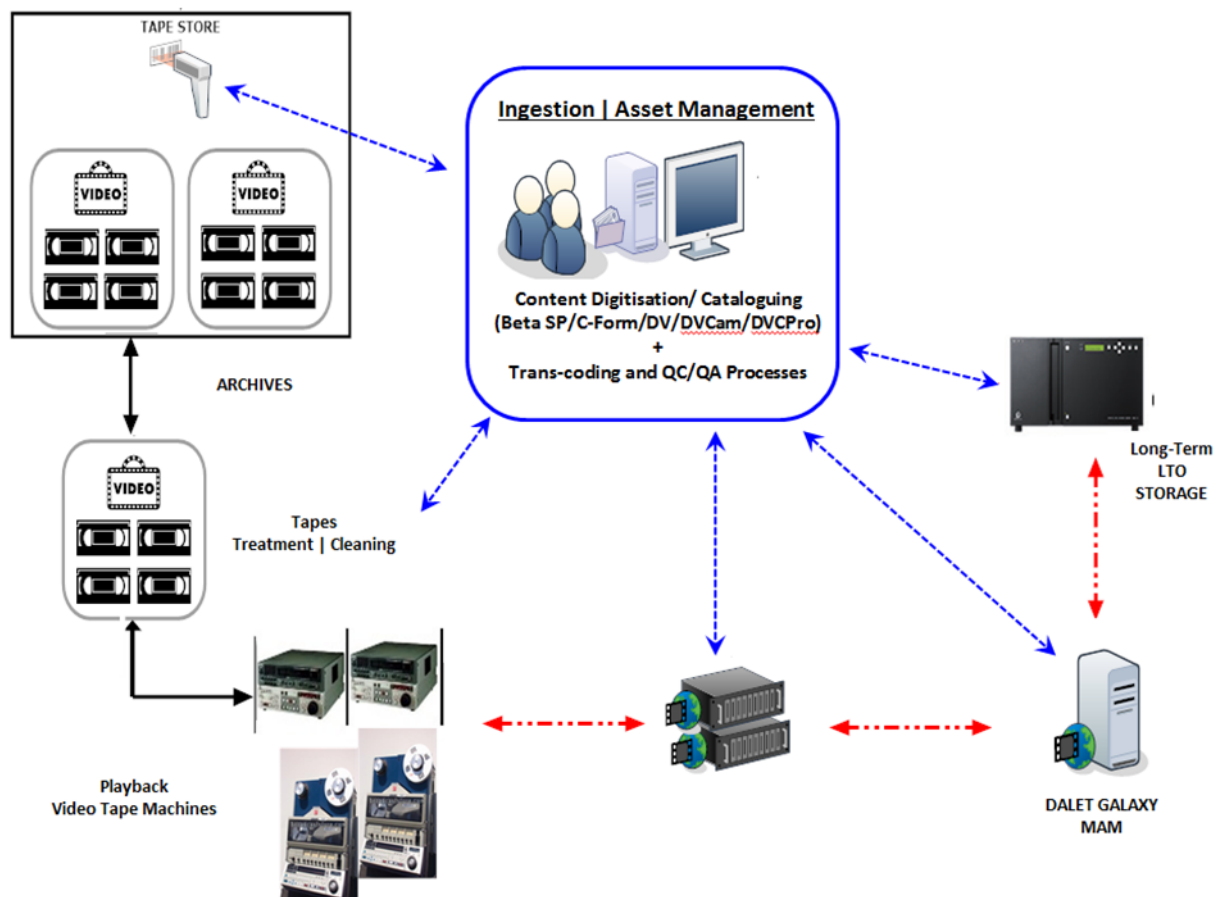

This RFP calls for the supply of equipment and services, the system design, installation, configuration, commissioning and operations (human resources) to digitise the SABC's Legacy content.

Additionally the SABC will provide the following:

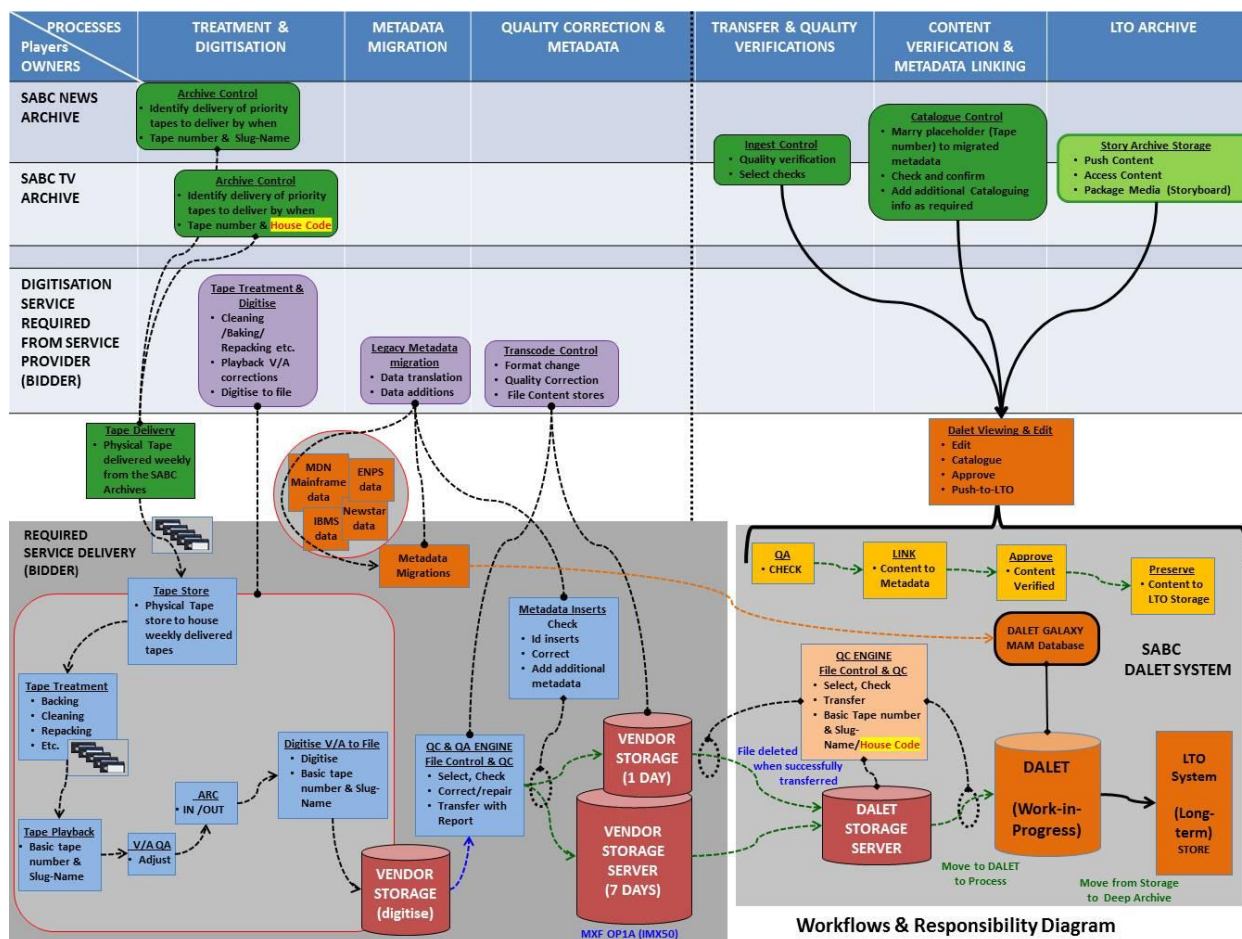

- Office space and installation site for the project
- UPS Power Source requirement for the machines
- Air Conditioned facility for the site system infrastructure
- Network and Telecommunications facilities (Internet/Telephone/Fax)
- Office Furniture (Desks and Chairs)
- The prioritised C- Format/1-inch format, DVCPro, DV/DVCam (SP/LP) and Betacam SP Content

2.1 The expected scope of services:

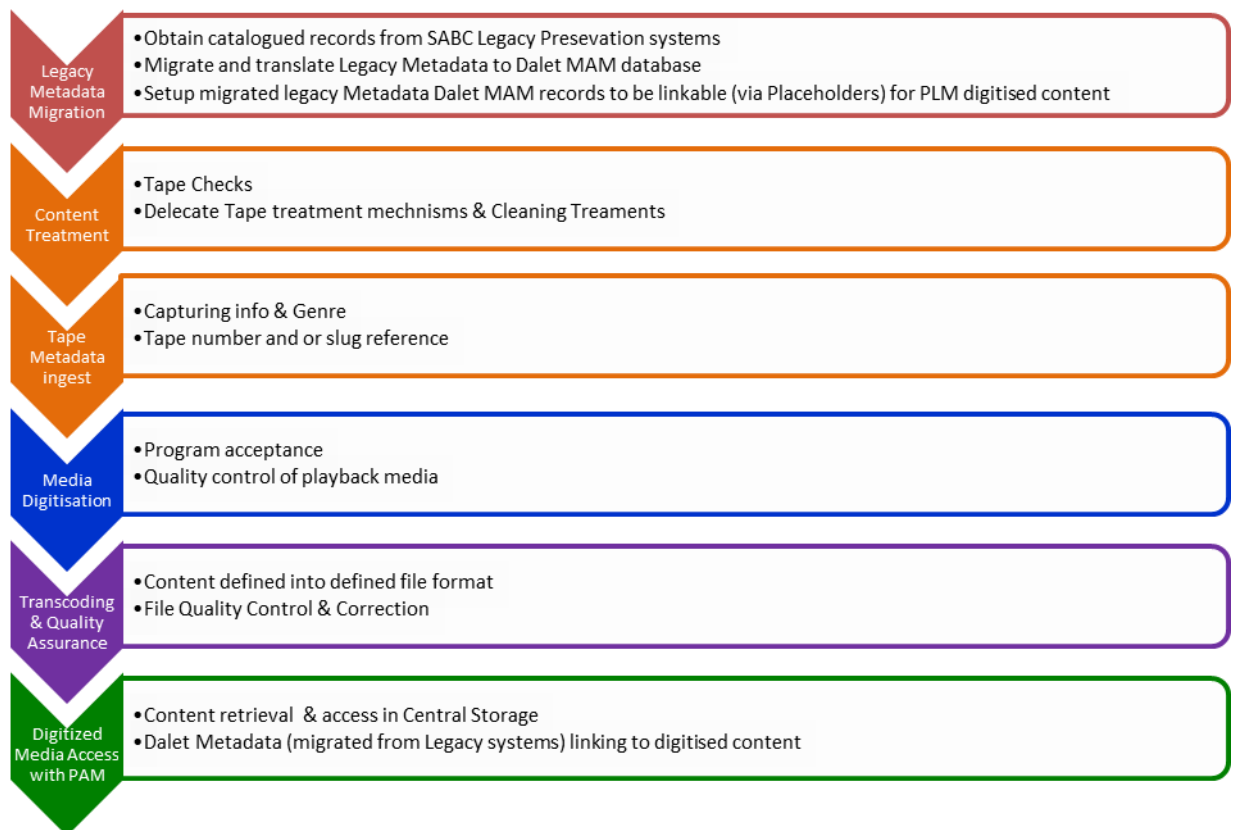

- 2.1.1 Supply of technical solution as per user requirements to enable the services
- 2.1.2 Installation, Workflow setups and Configuration of the proposed Digitisation solution
- 2.1.3 Quality assured Content delivery to the existing Dalet Galaxy system/s
- 2.1.4 Media digitisations and process services as required in the functional deliverables below
- 2.1.5 Project Management process and requirements

CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1.0 This Standard Bidding Document (SBD) must form part of all bids¹ invited.
- 2.0 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3.0 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
 - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4.0 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5.0 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for SABCs who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
