

TECHNOLOGY CATALOG

OUR STORY:

Technology Division has been providing TV technology operations, continentally internationally, and domestically, since the days of TV1, TV2, and TV3 leading to the dawn of democracy. Our technology and facilities have been the backbone of South African most-watched television dramas, soapies, historical sports, news, pageants, and national elections productions. Our television and radio facilities have kept the country entertained and educated. Our dedicated crew members have been at it, by keeping the country, our nation well informed and on par, on time, any time and everywhere.

WHAT MAKES US?

Technology Division is a division of the SABC whose strategic objective is to ensure that SABC has the appropriate and reliable technological infrastructure for production and delivery of broadcast programming, and digital media content whilst generating revenue. The generation of revenue is the responsibility of the Facilities Sales and marketing unit, which will be realized via marketing and selling of excess capacity of facilities to external clients.
